Finley Engineering Acquires Communications Engineers, Inc.

LAMAR, MO (July 26, 2010) — Finley Engineering, one of the largest independent engineering consulting firms in the country, has acquired Illinois based engineering firm Communications Engineers, Inc. "This strategic acquisition will increase Finley Engineering's presence in Illinois and the surrounding area, and complement our established presence in the communications industry," explains Rod Christenson, President and CEO of Finley Engineering. "Communications Engineers is well respected and has a long standing relationship with their client base in the region. Finley brings the additional resources and capabilities to Communications Engineers that will continue to benefit those clients well into the future."

Finley Engineering is recognized by Zweig White as one of the top 200 fastest growing A/E firms in the country. Finley provides leadership in engineering services and communications design by providing cost effective network solutions for its clients.

Communications Engineers, Inc. has provided engineering services to the telephone industry throughout the Midwest for more than 25 years. "We are very happy to be part of the Finley team," says Charlie Watts, General Manager of the Springfield office. "Our philosophy of working very closely with our clients fits very well with Finley's philosophy of national resources with local presence. We look forward to providing those additional resources from our Springfield office."

Communications Engineers has provided services to holding companies, independents, long distance carriers and local area networks. They have excelled through a unique combination of personal service and innovative engineering design.
